

1-to-2 optical splitter for fiber optic cable delivery

Overview

Our 1×2 FBT Splitter is a high-performance optical splitter designed for singlemode fiber networks. Featuring low insertion loss, wide operating wavelength (1260–1650nm), and excellent reliability, it's ideal for FTTH, CATV, and PON applications. Can distribute the evenly to each customer with strong stability. Convenient, fast and practical, can be installed directly in a variety of fiber optical exchange box. This PLC Splitter is a 1x2, with 1 input and 2 output fibers with an even split ratio across all fibers regardless of input wavelength. PLC Splitters are available with 900μm loose tube. Among the most compact yet essential components in the optical toolkit is the fiber optic splitter 1×2 —a device engineered to divide one optical input into two output channels without compromising signal quality.
