

48-core fiber optic junction box

Overview

The SJ-ODB-48-SMC is a 48 cores fiber optic termination box designed for efficient fiber optic cable management in FTTH and FTTx network installations. They are applicable to situations such as overhead, man-well of pipeline. WT-SF05-96A&48B provide with 6 fiber cable in-out round ports and the cable diameter is from 7~20mm. It is widely applied to the splicing and distributing variable optical cables by aerial, duct and burier. This product is made of high-quality ABS+PC and with the mechanical seal structure filled. 48 Port Fiber Distribution Box provides 16, 24, 32 or 48 SC ports in a traditional two-layer design - a rear splice area for cable slack and splice protection, and a front interconnect area for SC ports. Built with an IP65-rated enclosure, this terminal box is designed to withstand harsh environments, making it suitable. 48 Core Fiber Optic Junction Box, Joint Closure Fiber Optic Splicing

Decsription This splice closure integrates distribution and splitting in one, can realize the direct fusion and branching of the optical cable, and is suitable for the wiring connection in the optical communication equipment.
