

Add fiber optic cable box to straight tower

Overview

OPGW cable joint box installation involves several key stages: selecting the appropriate location, preparing both the cable and the joint box, splicing fibers, and sealing the joint box properly. Adhering to these steps ensures optimal performance and longevity of the telecommunications system. Always handle the equipment with the adequate care. Install cable always with factory-mounted installation tubes /. Deploying fiber above ground on poles or towers removes the need for underground digging and is particularly useful when the ground is uneven, rocky or both. This is the high-capacity link that connects the tower to the core. The Fiber Optic Association, Inc.
