

Albanian Imported ODN Optical Distribution Network Anti-Static Wholesale

Article Overview

ODN (Optical Distribution Network) products, including anti-static components, are available for wholesale purchase from Albanian suppliers and international manufacturers, suitable for FTTx and fiber-optic deployments.

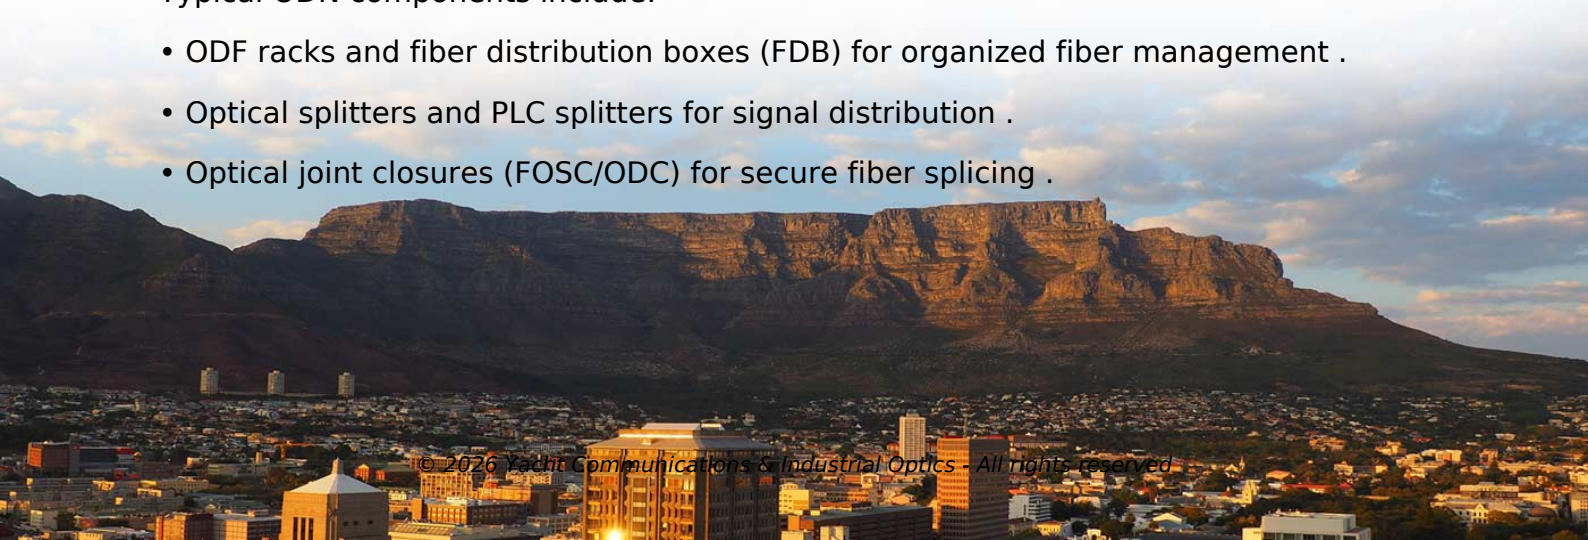

Overview of ODN

An Optical Distribution Network (ODN) is the passive fiber infrastructure connecting the Optical Line Terminal (OLT) at the central office to the Optical Network Unit (ONU/ONT) at the subscriber side. It is composed entirely of passive components, including fiber cables, splitters, distribution boxes, patch cords, and closures, which guide, split, and protect optical signals without requiring electrical power. ODNs are critical for FTTH/FTTx networks, supporting high-speed broadband, IPTV, and voice services.

Key Components

Typical ODN components include:

- ODF racks and fiber distribution boxes (FDB) for organized fiber management .
- Optical splitters and PLC splitters for signal distribution .
- Optical joint closures (FOSC/ODC) for secure fiber splicing .
