

BESS Energy Storage System Energy-Saving Solution in Cambodia

Overview

Developed by SchneiTec, a key player in renewable energy in Cambodia, this BESS marks a decisive turning point. Integrated into the national grid, it stores excess solar electricity produced during the day to release it at night, thereby minimizing the risks of outages and imports. Battery energy storage system (BESS) at Cambodia's National Solar Park in Kampong Chhnang province. MANILA, PHILIPPINES (24 June 2026) — The Asian Development Bank (ADB) has approved a \$63. 44 million financing package to accelerate the integration of renewable energy into Cambodia's power system. Huawei Digital Power has successfully commissioned what it claims is Cambodia's first grid-forming battery energy storage system (BESS) certified by TÜV SÜD. Image: Agence Kampuchea Presse (AKP). A 500MW/1,000MWh battery energy storage system (BESS) with grid-forming inverters has gone into commercial operation in Cambodia.
