

Communication wall-mounted optical cable model

Article Overview

Wall-mounted optical cable models include fiber panels, splice trays, and external ODF cabinets designed for secure, organized fiber management in indoor and outdoor environments.

Indoor Wall-Mounted Fiber Panels

Indoor wall-mounted fiber panels are designed to accommodate LC, SC, and MTP/MPO connectors and are ideal for enterprise networks, data centers, and telecom installations. Examples include:

- **CommScope Propel Series Sliding Fiber Optic Panels:** These panels hold modular fiber cassettes, adapter packs, and splice trays, supporting up to 864 fibers. They offer flexibility for singlemode and multimode fibers (OM3, OM4, OM5) and allow plug-and-play MPO architecture for high-speed network migration .
- **NG4access Modules:** Interchangeable modules and adapter packs provide scalable connectivity options, including monitoring and splitter modules for advanced network management .

Outdoor Wall-Mounted ODF Cabinets

For external environments, wall-mounted optical distribution frames (ODFs) provide robust protection against weather and corrosion:
