

Distribution Network Automation QSFP28 Optical Module Anti-Static

Overview

The QSFP28-100G-ZR4-S Module is designed for use in 100GBASE Ethernet throughput up to 80km over single mode fiber (SMF) using a wavelength of 1310nm via duplex LC connectors. The Cisco QSFP28 100G ZR module expands the portfolio of digital coherent optics (DCO) modules to connect QSFP28. eed communications equipment. Both short range and long-range transceiver modules are available for aximum customer flexibility. The FS® 100GBASE Quad Small Form-Factor Pluggable (QSFP28) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. This TIDA-00427 design guide summarizes the results of 100G CAUI-4 testing using the DS280BR810 low-power, 28-Gpbs, 8-channel linear repeater from Texas Instruments (TI). This guide also provides test results against the specifications of 40-GbE nPPI and SFF8431. The DS280BR810 has been tested in.
