

Distribution box cover mounted on the wall

Article Overview

Wall-mounted distribution box covers protect electrical circuits, provide easy access, and can be installed indoors or outdoors with waterproof and durable designs.

Overview

A distribution box (DB box) is a central hub for electrical power distribution, housing circuit breakers, fuses, bus bars, and other protective devices. Wall-mounted covers serve to protect these components from dust, moisture, and accidental contact, while allowing convenient access for maintenance and monitoring .

Types of Wall-Mounted Covers

- **Surface-Mounted Covers:** Installed directly on the wall, these are easy to access and suitable for both indoor and outdoor environments. They often feature transparent or hinged covers for quick inspection of circuit breakers .
- **Flush-Mounted Covers:** Embedded within walls for a cleaner look, commonly used in modern homes and offices. These covers maintain aesthetic appeal while providing full protection .
- **Waterproof Covers:** Rated IP65-IP68, these covers protect against dust, rain, and UV exposure, making them ideal for outdoor or industrial installations .
- **Decorative or Concealed Covers:** Options include artwork, slatted panels, or custom cabinets that hide the panel while allowing easy access when needed .
