

Dust gets into the network cabinet

Overview

One of the most effective strategies for keeping your network cabinet dust-free is to establish a regular cleaning schedule. This involves both the interior and exterior of the cabinet, focusing on areas that are prone to dust accumulation. Dust accumulation can be a significant hindrance to performance, potentially leading to overheating, reduced air flow, and even equipment failure. The rack is in an office/open room. And it is that, by definition, dust, are fine particles of matter called airborne, which usually consists of particles in the atmosphere that come from various sources, such as soil, dust. Dust is a natural part of our environment and it's everywhere. But when it comes to your server room, excessive amounts of dust can cause all sorts of problems.
