

Fiber Optic Cable Location Detector

Overview

Cable locators, also known as electromagnetic locators, are widely used to find buried cables. These devices send signals through the cable, which can then be detected using a handheld receiver. Equip your fiber optic toolkit with a reliable visual fault locator. u-LOCATE allows you to quickly and accurately locate underground utilities, helping prevent costly damages, utility strikes, and service. Fluke Networks sets the standard in network testing with its advanced range of fiber optic power meters and fault locators, designed to ensure the highest precision in fiber optic meter readings and power evaluations. This guide will explain the most effective methods to locate buried. FS offers 1mW, 1.
