

Fiber optic cable connection SC

Article Overview

Connecting an SC fiber optic cable involves preparing the fiber, inserting it into the SC connector using a push-pull latch mechanism, securing it, and cleaning the end face for optimal signal performance.

Tools and Materials Needed

- Fiber strippers and cleaver for precise cutting
- SC connector kit (single-mode or multi-mode)
- UV-curable glue or epoxy
- UV lamp or curing device
- Crimping pliers and fiber holders
- Anhydrous alcohol and lint-free wipes for cleaning
- Safety gloves and glasses to protect against fiber shards

Step-by-Step Connection Process

- Prepare the Fiber: Strip the outer jacket and buffer coating carefully without nicking the fiber. Inspect the fiber for damage or bends .
- Insert Connector Boot: Slide the SC connector boot and any riveting ring onto the fiber before applying glue .
- Apply Glue: Inject UV-curable glue into the connector ferrule from the tail end until it slightly overflows. Set the connector aside for curing .
