

Fiber optic distribution box is waterproof and moisture-proof

Overview

An IP68 fiber distribution box is a sealed outdoor enclosure that protects fiber splices, connectors, and adapters from environmental stress. Leading designs now align with updated standards like ISO 30161, ensuring that each optical fiber terminal box supports secure. The 8 port waterproof fiber optic distribution box series (SP-FTTH-A08, SP-FTTH-A08M1, SP-FTTH-A08M2) delivers versatile, high-reliability termination and distribution for FTTH networks. It offers a 12-fiber MTP adapter on the rear of the units routed to duplex LC adapters on the side field, which interconnect with high-density fiber cable assemblies. The MTP-LC distribution box has an IP67.
