

How much does a portable optical cable pulling machine cost

Article Overview

A portable optical cable pulling machine typically costs around \$27,000 to purchase, with rental options starting at \$300 per day.

Purchase and Financing Options

The average purchase price for a fiber optic cable puller is approximately \$27,304, though this can vary depending on brand, model, and included features . Financing is also available, with typical terms around \$514 per month on a 60-month lease . Prices may fluctuate based on motor power, pulling force, build quality, and additional accessories .

Rental Options

For short-term projects or testing, rental is a cost-effective alternative. Rental rates generally start at \$300 per day, \$979 per week, or \$3,075 per month . Renting allows access to high-quality machines without the upfront investment.

Factors Affecting Cost

Several factors influence the price of a portable optical cable pulling machine :

- Power source: Manual, electric, hydraulic, or gas-powered units affect both cost and portability.
- Pulling force and speed: Machines with higher tension capacity and adjustable speed are more expensive.
