

How much does a ton of Portuguese wire mesh cable tray cost

Article Overview

A ton of wire mesh cable tray in Portugal typically costs between \$800 and \$2,500, depending on material, gauge, and supplier.

Wire mesh cable trays are generally made from steel or aluminum and are considered a cost-effective solution for cable management due to their durability, ease of installation, and low maintenance requirements . In 2025, the market price for wire mesh ranged from \$800 to \$2,500 per ton, influenced by factors such as raw material costs, wire gauge, surface coatings, order volume, and supplier location . Factors affecting the cost:

- Material type: Galvanized steel is common and balances price with durability, while stainless steel is more expensive due to corrosion resistance. Aluminum is lightweight but pricier than steel .
- Surface finish: Hot-dip galvanizing (HDG) or powder coating increases cost but improves longevity .
- Order volume: Bulk purchases can reduce the per-ton price.
