

How to connect the armored pigtail junction box

Article Overview

To connect an armored pigtail to a junction box, carefully prepare the cable, install a proper connector or gland, and securely terminate the wires inside the box while ensuring safety and compliance.

Safety First

Before starting, turn off the power at the circuit breaker and verify with a non-contact voltage tester that the wires are de-energized. This step is critical to prevent electrical shock.

Tools and Materials Needed

- Armored cable cutter or hacksaw
- Cable stripper or utility knife
- Screwdriver and locknut wrench
- Armored cable connector or cable gland (matching cable size)
- Insulating anti-short bushing (red head)
- Wire strippers

Step-by-Step Procedure
