

How to connect the intermediate joint of cable tray

Overview

Place the joint plate centrally on the joint area of the cable trays. To avoid damage to cables, edge protection strip is attached at cut edges of cable trays, if no joint plates or bottom end plates are to be mounted. Cut the edge. The most common cable tray connection methods include: Each method differs in installation time, cost, flexibility, and strength. We use cable trays to hold and organise electrical cables. more Joint RSS is pushed inside the cable tray and is fixed with the set of screws included with the. We recognize the need for a complete cable tray reference source for electrical engineers and designers. The following pages address the 2014 National Electrical Code® requirements for cable tray systems as well as design solutions from practical experience. The information has been organized for. Up to a tray width of 300 mm, the mounting of the joint plate is optional. In accordance with National Electrical Code (NEC) Article 392 "Cable trays" first determine the Maximum Fuse Ampere Rating or Circuit Breaker Ampere Trip Setting or Circuit Breaker Protective Relay Ampere Trip Setting for Ground-Fault Protection s the minimum.
