

How to make a parallel 30-degree bend in a cable tray

Overview

For a 30-degree bend, the multiplier is 2. Thus, for a 4-inch offset, multiply 4 by 2 to get 8, placing your second mark at 14 inches. Position the bender's arrow on the first 6-inch mark and create the first 30-degree bend. Make sure the conduit remains straight and aligned. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. The first step in preparing the. Students trading aid on how best to put an internal 90 degrees bend in steel cable tray.
