

How to record the workload of fiber optic cable splicing

Overview

Use this fiber optic splicing report template to document telecom field work from start to finish. Record customer and work order details, crew roles, and work completed such as butt splice, ring tap, fiber turn, testing, and case re entry. Record the job details (conducted on, prepared by, location) and the joint name, then capture photographic evidence of strength members, internal splicing across all trays and splitters. The Fiber Optic Splicing Playbook v3. Developed by Eugen Cravcenco, it's a practical reference for QA/QC and leadership in. Record the installation details, cable IDs, tray assignments, slack storage, and final seal checks for a buried or aerial fiber splice closure. With this app. For outside plant work, fusion splicing is almost always the right choice. Mechanical splices are faster for emergency restoration but have higher typical loss (0. 1dB for fusion) and degrade over time in outdoor environments.
