

Jordan and Fiber Optic Cables

Article Overview

Yes, Jordan produces fiber optic cables through local manufacturers such as Techline and Technical Fiber Optics Lines, which serve both domestic and international markets.

Local Manufacturing

Jordan hosts factories that manufacture fiber optic cables and related equipment. Techline, a Jordanian company, produces a complete range of fiber optic passive equipment, including indoor and outdoor fiber cables, distribution boxes, and joint closures, catering to the telecommunications sector in the MENA region . Another facility, Technical Fiber Optics Lines, was visited by King Abdullah and is noted for exporting 80% of its production to Arab and European countries, highlighting Jordan's role as a regional producer . These factories also provide employment opportunities and are expanding into technologies like 5G.

Domestic Fiber Optic Infrastructure

Jordan has invested heavily in fiber optic networks to support digital transformation. The National Broadband Network Program covers over 6,400 km of fiber optic cables, connecting government institutions, schools, and healthcare facilities, and enabling private companies to access fiber strands for service delivery . Additionally, NEPCO, the National Electric Power Company, operates an optical fiber network along its transmission lines and rents excess capacity to institutions and telecom companies, further supporting the domestic fiber optic ecosystem .
