

Key Points for Inspecting Fixed Distribution Boxes

Article Overview

Inspecting fixed distribution boxes requires a thorough review of physical condition, internal components, electrical connections, safety systems, and compliance with standards to ensure reliability and prevent hazards.

External Inspection

- **Physical Condition:** Check for corrosion, rust, dents, or other physical damage to the enclosure. Ensure the box is securely mounted and labels or warning signs are legible .
- **Environmental Protection:** Verify IP-rated seals and moisture-proof measures, especially in humid or outdoor environments .
- **Temperature and Ventilation:** Ensure ventilation openings are clear and temperature sensors indicate normal operating ranges .

Internal Inspection

- **Cleanliness:** Remove dust, debris, and any foreign objects that could cause short circuits or overheating .
- **Connections and Wiring:** Check that all connections are tight, secure, and free from signs of wear, burning, or arcing .
- **Circuit Breakers and Protective Devices:** Test Air Circuit Breakers (ACBs) and other protective devices for proper operation, including manual opening and closing, and verify surge protection devices .
