

Monaco fiber optic cable put into operation

Overview

Monaco reached 100% fiber-optic broadband coverage in 2023, with copper DSL retired at the end of 2023 under the Extended Monaco program. Residential fiber speeds include 100. Dedicated Fiber or FTTO (Fiber To The Office) is the most advanced technology for Internet access. Internet access is directly connected to the optical connection point. After three years of laying 210 kilometres of new network cables, Monaco. During the project, a fibre optic cable was installed in each of the two renovated pipes. They were already inserted during the factory folding process of the liner into a U-shape and then pulled into the old. From August 1, telephone calls and access to the internet will have to rely on new technologies or risk no longer working. More than 600 companies will migrate to the fibre network. Monaco Telecom, the primary telecommunications operator in the Principality of Monaco, has completed the deployment of its fiber broadband network, providing 100% coverage to the entire country except for some buildings currently undergoing renovation.
