

Parameters of a 24-port PoE switch

Article Overview

A 24-port PoE switch typically supports multiple standards and features, providing power and data connectivity for various devices like IP cameras and access points.

Key Specifications

-

Port Configuration:

- 24 Ports: Usually 10/100/1000 Mbps Ethernet ports.
- PoE Standards: Supports IEEE 802.3af (PoE), 802.3at (PoE+), and sometimes 802.3bt (PoE++) for higher power delivery.

-

Power Output:

- Total PoE Power Budget: Ranges from 180W to 400W, depending on the model.
- Per Port Power: Typically provides up to 30W per port for PoE+ and up to 60W for PoE++ on select ports.

-

Additional Features:

- Management Options: Many models offer web-based management, SNMP support, and advanced features like VLANs, QoS, and IGMP snooping for multicast traffic management.
