

Price list for optical fiber splicing materials

Article Overview

Fiber optic splicing materials range from \$0.50-\$150 per item depending on type, with fusion splicing labor typically costing \$50-\$150 per splice.

Fusion Splicing Labor Costs

For commercial projects, fusion splicing labor is usually quoted per splice point, ranging from \$50 to \$150 per splice. The cost depends on factors such as fiber count, site conditions, and project scale. Large projects with high fiber counts often benefit from volume pricing, which can reduce the per-splice rate significantly. Labor costs generally include OTDR verification but exclude materials like closures, trays, or project management fees .

Common Splicing Materials and Prices

- **Splice Trays** Used for proper alignment and protection of fiber cables, splice trays ensure long-lasting connections. Prices typically range from \$5 to \$20 per tray, depending on capacity and manufacturer .
- **Heat Shrink Protectors** Heat shrink sleeves protect splices from environmental factors such as water and dust. These are usually priced between \$0.50 and \$2 per sleeve, depending on size and quality .
- **Mechanical Splices** High-quality mechanical splices from brands like 3M Fibrlok, Corning Camsplice, and AMP CoreLink are available, with prices generally ranging from \$5 to \$15 per splice .
