

Price of Fireproof Galvanized Cable Tray Factory

Article Overview

Factory prices for fireproof galvanized cable trays typically range from \$15 to \$50 per meter, depending on specifications, load capacity, and customization options.

Factors Affecting Price

- **Material and Coating:** Hot-dip galvanized steel is standard for fireproof trays, offering high strength and corrosion resistance. Additional fireproof coatings or powder coatings can increase the cost .
- **Fire Rating:** Trays with higher fire resistance (e.g., 60, 90, 120 minutes) or compliance with standards like UL, BS, IEC, or ISO 834-1 generally cost more .
- **Load Capacity and Size:** Wider trays or those designed for heavy-duty industrial use (10–15 kg/m or more) are priced higher due to increased material usage and structural reinforcement .
- **Customization:** Factory customization for specific lengths, widths, perforation patterns, or bolt connections can affect pricing .
- **Quantity and MOQ:** Bulk orders often reduce the per-meter cost, while small orders may carry a premium .

Typical Price Range

- **Standard industrial galvanized trays:** \$15–\$25 per meter for basic fireproof models suitable for workshops or commercial buildings .
