

Price of Russian-style Fireproof Cable Trays

Article Overview

The price of Russian fireproof cable trays varies widely depending on material, type, and supplier, typically ranging from \$20 to \$150 per meter for standard fiberglass or metal trays.

Factors Affecting Price

- **Material:** Fireproof cable trays are commonly made from fiberglass, steel, or aluminum. Fiberglass trays are corrosion-resistant and lightweight, often slightly more expensive than standard metal trays .
- **Type of Tray:** Prices differ based on design:
 - **Perforated trays:** Allow ventilation and cooling, suitable for voltages up to 1000V .
 - **Solid trays:** Fully enclosed, providing maximum protection from external hazards .
 - **Ladder trays:** Stamped sides with crosspieces, ideal for high-capacity power supply .
 - **Wire mesh trays:** Lightweight and flexible, often used for smaller cable networks .
- **Size and Length:** Longer sections or wider trays increase material costs. Standard lengths are usually 2-3 meters per section.
- **Fireproof Rating and Certification:** Trays with higher fire-resistance ratings or compliance with Russian and international standards may cost more.
