

Price of the black box for optical fiber cables

Article Overview

Black Box optical fiber cables typically range from \$50 to several hundred dollars depending on type, length, and pre-termination options.

Pricing Overview

The cost of Black Box fiber optic cables varies significantly based on cable type, length, and configuration:

- Pre-terminated fiber cables (MTP/MPO or APC connectors) are more expensive due to labor-saving features and testing. These can range from \$100 to \$500 or more per cable, depending on length and connector type .
- Bulk fiber optic cables (e.g., 1000-foot spools of multimode or single-mode fiber) are generally less expensive per foot, with prices typically around \$50 to \$200 per spool for standard indoor/outdoor rated cables .
- Patch cables and short runs (1-10 meters) are usually priced between \$20 and \$100, depending on fiber type (OM3, OM4, single-mode) and connector quality .

Factors Affecting Price

- Fiber Type: Single-mode cables are generally more expensive than multimode due to higher performance over long distances.
- Connector Type: Angled-polished connectors (APC) and MTP/MPO pre-terminated assemblies cost more than standard connectors.
