

Quotation for 1000mm deep fiber optic cable trays for backbone networks

Article Overview

Fiber optic cable trays with 1000mm depth are available from multiple suppliers and can be customized for backbone network installations; quotations are provided upon request.

Product Overview

Fiber optic cable trays are designed to safely route and protect fiber optic and high-performance copper cables in backbone networks, data centers, enterprise networks, and central offices. A 1000mm deep tray provides ample space for high-density cabling, ensuring proper bending radius, physical protection, and organized routing .

Key Features:

- **Material Options:** Flame-retardant plastics (PVC, ABS, PP) or metal wire mesh for durability and safety .
- **Installation Methods:** Cabinet mounting, side mounting, ceiling hoisting, or integration with other cable trays and ladders .
- **Accessories:** Brackets, splice bars, connectors, and transitional fittings for flexible routing and secure installation .
- **Design:** Enclosed or open structures, tool-free assembly, snap-on covers, and hinged options for easy maintenance .
- **Customization:** Many suppliers offer custom sizes, including 1000mm depth, to meet specific backbone network requirements .
