

Singapore fiber optic cable issue

Overview

The Land Transport Authority is investigating why a backup fibre-optic cable failed after construction works damaged underground lines on 18 April, disrupting Singapore's bus arrival timing system and causing broadband outages affecting about 5,000 subscribers. The fibre broadband outage affected more than 5,000 households in Ang Mo Kio, Bishan, Sengkang and Punggol for 20 hours on April 18. SINGAPORE – Asia Piling, a company involved in many public and commercial projects here, is the sub-contractor that hit critical underground fibre-optic cables. An international slowdown looks the same from inside a network whether the cause is local or a cable fault half a world away. SubseaDown tracks incidents on every cable on the map — automated research, human curation, and an operator community, working together. Open to everyone — no signup wall.
