

Single-mode 4-core fiber optic cable price quote

Article Overview

The price of a 4-core single-mode fiber optic cable typically ranges from \$0.10 to \$7 per foot, depending on construction, jacket type, and additional features.

Pricing Overview

For a 4-core single-mode fiber optic cable, the cost varies based on several factors:

- **Cable Type and Fiber Count:** Single-mode fiber generally costs \$0.10 to \$0.50 per foot for standard cables, while bulk or higher-quality cables can reach \$2 to \$7 per foot for pre-terminated or armored versions .
- **Construction and Jacket:** Indoor PVC or LSZH jackets are less expensive, whereas outdoor, UV-resistant, or armored cables increase the price due to added materials and durability requirements .
- **Application:** Direct burial, aerial, or harsh-environment installations require specialized construction, which can raise costs by 20-50% compared to standard indoor cables .
- **Additional Features:** Pre-terminated connectors (SC, LC, FC), armored protection, or UV resistance add to the upfront cost but reduce long-term maintenance and installation labor .

Total Cost Considerations

When evaluating a 4-core single-mode fiber optic cable, consider:
