

# Tanzania exports AI server OSFP

## Article Overview

Tanzania currently does not appear to export AI server OSFP modules, but it is actively developing AI and ICT capabilities that could support future technology exports.

### AI and ICT Development in Tanzania

Tanzania has identified Artificial Intelligence (AI) as a strategic priority within its National AI Strategy Framework and broader digital economy initiatives, aiming to position the country as a regional tech hub in East Africa . The government supports AI adoption across sectors, including agriculture, finance, and trade, with pilot projects demonstrating AI-driven inspection systems to improve export quality and compliance . The Ministry of Innovation, Science, and Technology, along with the Tanzania Communications Regulatory Authority (TCRA), is actively developing governance frameworks and ICT sector targets to scale AI infrastructure .

### Tanzania's Export Landscape

Tanzania's exports are dominated by minerals, services, and agricultural products, with manufactured goods representing a small share of total exports . Key export facilitation initiatives include the Tanzania Electronic Single Window System (TeSWS) and the Tanzania Mercantile Exchange (TMX), which streamline trade processes and commodity pricing . While the country is modernizing ports and logistics infrastructure, including the Dar es Salaam Port and Central Corridor freight services, the current export basket does not list AI server components or OSFP modules .

### Potential for AI Hardware Exports
