

The electrical box made a knocking sound

Overview

The issue is likely a bad breaker mechanism or a fault on the busbar connection itself. Check the torque on the buzzing breaker's load terminal and the mounting clip (if bolt-on). Customer: My electrical box occasionally makes a loud clicking or banging noise that lasts for several seconds, but there's never any loss of power and no fuses have tripped. There are several reasons why your panel might be. A breaker panel, often called a service panel or breaker box, is the central distribution point for your home's electricity, housing the circuit breakers that protect individual circuits from overcurrent. Hearing a crackling or sizzling sound from this metal box is a severe indication of an active. Many electrical systems and products produce a buzzing sound as the electric current flows through the wiring. We took off the wall plate and looked around.
