

Top-tier electrical distribution box installation price

Overview

For most homes, a 100–125 A main panel swap or a 200 A upgrade runs between \$1,200 and \$3,500, depending on panel type and wiring needs. Understanding distribution box cost involves examining the comprehensive investment required for electrical distribution systems that serve as crucial infrastructure components in residential, commercial, and industrial settings. Price estimates combine material costs, labor time, and any required permits or upgrades. If you're planning any electrical work, one of the small but important items on your list will be the junction box. At first. Typical residential installations or replacements range from \$600 – \$2,000 (most between \$1,000 – \$1,400), with 200A-rated and outdoor-weatherproof units positioned at the higher end. Smart Upgrades: High-tech “smart” panels cost \$2,000 to \$5,000 more than standard hardware.
