

Unit Price for Fiber Optic Cable Laying Construction

Article Overview

Fiber optic cable laying typically costs between \$2.50 and \$8.50 per linear foot, depending on installation method, fiber type, and project complexity.

Material Costs

Fiber optic cable materials alone range from \$0.09 to \$6 per foot, depending on fiber type, strand count, and construction. Single-mode fiber is generally cheaper per foot (\$0.10–\$0.50) than multimode fiber (\$0.30–\$1.00), while high-strand-count cables (e.g., 24–288 strands) increase costs proportionally. Armored or direct-burial cables suitable for harsh environments can cost \$0.50–\$5 per foot. Pre-terminated assemblies and patch cables are more expensive due to factory termination and connector types .

Installation Costs

The cost of laying fiber optic cable includes labor, trenching or aerial deployment, conduit, and permits. Typical per-foot installation rates are:

- Underground trenching: \$2.50–\$8.50 per linear foot, depending on trench depth, soil conditions, and conduit requirements .
- Aerial deployment: Often 20–40% cheaper than underground due to reduced labor and equipment needs .
- Conduit costs: \$0.60–\$2.20 per foot when bundled with installation .
