

What is the price range for galvanized cable trays from North Asia

Article Overview

Galvanized cable trays in North Asia typically range from \$0.80 to \$76 per unit, or \$2 to \$25 per meter depending on type, size, and coating.

Overview of Pricing

The price of galvanized cable trays varies widely based on material, type, size, and surface finish. Standard galvanized steel trays are the most common, balancing durability and cost, while hot-dip galvanized (HDG) trays or coated variants command higher prices due to enhanced corrosion resistance .

- B2B bulk pricing on platforms like Alibaba ranges from \$0.80 to over \$76 per unit, reflecting differences in tray dimensions, thickness, and galvanization method .
- Per-meter pricing typically falls between \$2 and \$25, with steel trays on the lower end and custom or coated trays on the higher end .

Factors Affecting Price

- Material and Coating: Hot-dip galvanization (HDG) increases durability and outdoor lifespan but costs more than pre-galvanized steel. Powder-coated or epoxy-coated trays also add to the price .
- Tray Type: Ladder trays are more expensive due to higher load capacity, while perforated or wire mesh trays are cheaper and suitable for lighter applications .
- Size and Thickness: Larger widths, higher load ratings, and thicker steel increase unit cost .
