

What size router is best for a 100Mbps home fiber optic connection

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Searching for the ideal WiFi router to match your 100 Mbps internet speed?

You're in the right place! In this guide, we'll explore the top routers tailored to deliver optimal performance for your 100 Mbps connection. For budget-conscious. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space. To simplify. Coverage depends on the home layout, so large or multi-floor homes benefit from mesh systems or routers with a strong range. I worked with the Cybernews research team to review and compare different routers and give.
