

Where should the RRU optical module be placed

Overview

Generally, the BBU and RRU are operated separately, the BBU is placed in the engine room and the RRU is placed on the tower, and the equipment connecting the BBU and RRU are optical modules and optical fibers. This document describes the procedures of installing an eRRU. Difference in installation and operation of other eRRU products are also described. Page 4 Indicates an. Connection to Antenna: The RRU connects to the antenna via jumper cables (coaxial cables), which are responsible for transmitting RF signals. Signal Processing and Conversion: The RRU converts RF signals. Use the power cable clip to press the shielding layer tightly and ensure that the lower part of the shielding layer does not exceed the position shown in the preceding figure.
