

Where to connect the fiber optic cable to the fiber optic terminal box

Article Overview

Connecting a fiber optic cable to a terminal box involves careful preparation, proper insertion into the designated ports, and testing to ensure optimal signal transmission.

Tools and Materials Needed

- Fiber optic terminal box (FTTH or indoor type)
- Fiber optic cable and pigtails
- Fiber adapters (LC, SC, or ST depending on your system)
- Fiber cleaver and cutting pliers
- Cleaning agent (alcohol or specialized fiber cleaner)
- Gloves and safety glasses
- Labeling tape for cable identification
- Fiber optic power meter or tester for verification

Step-by-Step Connection Process

1. Prepare the Installation Location Choose a stable location for the terminal box, typically on a wall or cable rack, leaving at least 20 cm of space for cable storage . Secure the box using screws or other suitable mounting hardware. 2. Prepare the Fiber Optic Cable

- Cut the fiber optic cable to the required length using fiber cutting pliers.
