

Wholesale price for 12-core optical fiber distribution box

Article Overview

Wholesale prices for 12-core optical fiber distribution boxes vary based on quantity, quality, and supplier, typically requiring direct quotation from manufacturers.

Overview

A 12-core optical fiber distribution box is designed for FTTH, FTTx, CATV, and data communication networks, providing secure termination, splicing, and distribution for up to 12 fiber cores. These boxes are available in plastic or metal housings, often rated IP65 for outdoor use, and may include features like SC adapters, 1:8 splitters, anti-theft locks, and two-layer designs for easy fiber management. They can accommodate two incoming cables and 12 drop cables, suitable for both indoor and outdoor deployment.

Wholesale Pricing Factors

- **Quantity:** Bulk orders (e.g., container loads) usually receive lower per-unit prices. Suppliers often provide tiered pricing depending on order size.
- **Quality and Certification:** Products with ISO, ROHS, or CPI certification may cost more but ensure compliance with international standards.
- **Material and Features:** Metal boxes or those with integrated splitters and higher IP ratings may be priced higher than basic plastic models.
- **Shipping Terms:** Prices vary depending on EXW, FOB, CIF, DAP, or DDP shipping options. Freight costs can significantly affect the total wholesale price.
